

# VIRUS ON A PC / LAPTOP ONBOARD

42

	ACTION (NOT NECESSARILY IN ORDER)
<input type="checkbox"/>	If the PC is behaving abnormally take screenshot of the issues observed on the PC. This may include a Notice received indicating that the PC is infected by a virus.
<input type="checkbox"/>	Disconnect the lan cable from the pc.
<input type="checkbox"/>	Run the anti-virus software program to remove the virus.
<input type="checkbox"/>	Should the PC continue to behave abnormally power down the PC and power up the PC again.
<input type="checkbox"/>	Re-run the virus software program to remove the virus. If the Virus message has not been removed or the PC continues to function abnormally, power down the PC.
<input type="checkbox"/>	Keep the PC isolated and confirm that the PC remains disconnected from the Lan system. Place a sign on the monitor that the PC is not to be used until further notice.
<input type="checkbox"/>	CALL THE OFFICE IT DEPARTMENT ON THE FOLLOWING: <b>IT Emergency Response (24 H)      Tele: +27 (0)79 902 5219</b>
<input type="checkbox"/>	The duty IT representative will guide the Master through the process of confirming the extent of the breach of the Cyber security on the Vessel's IT infrastructure.
<input type="checkbox"/>	IT will ensure that the server has not been compromised.
<input type="checkbox"/>	IT will ensure that all other PC's have not been compromised.
<input type="checkbox"/>	IT will ensure that the affected PC is repaired satisfactorily.
<input type="checkbox"/>	IT will expressly instruct the vessel to reconnect the PC to the Lan system. Do not reconnect the PC until IT have confirmed it is safe to do so.
