October 14, 2022

National Vessel Movement Center (NVMC)

Release of new NOAD Workbook version 7.8

The **U.S. Coast Guard National Vessel Movement Center (NVMC)** has released a new version 7.8 of the **Notice of Arrival and Departure (NOAD) Workbook**. This new version can be downloaded from the [NVMC website](#) and contains enhancements to facilitate easier data entry and submission, which are summarized below:

- New “Fuel Type” fields introduced
- Crew/Passenger gender fields have been changed to a picklist

Note: If you are unable to access the NVMC website and/or cannot download the new NOAD Workbook, please contact us at the address below for a copy via email.

With the release of NOAD Workbook version 7.8, the NVMC will no longer support Workbook versions 7.6 and 7.6.1.

NOAD Workbook versions 7.7, 7.7.1 and 7.7.2 remain acceptable until further notice, but the timeline for their retirement is unknown. We therefore encourage all vessels to upgrade their NOAD workbooks to the latest version 7.8 as soon as possible and use this for future submissions via email.
