**A Guideline to the Unified Technical File
MAN B&W Two-stroke Engines**
Action Code: COMMERCIAL / FOR INFO

Dear Sirs

IMO's Annex VI of MARPOL 73/78 regarding the Prevention of Air Pollution from Ships is set to enter into force on 19 May 2005. Therefore, the full set of MARPOL international regulations for the prevention of pollution by ships will be in force, and their effective implementation and enforcement must now be ensured.

The limits on emissions of nitrogen oxides (NO_x) from diesel engines are specified in Regulation 13 of Annex VI.

In order to assist your staff working with this subject, MAN B&W Diesel has worked out the above-mentioned handbook, dealing with air pollution from diesel engines.

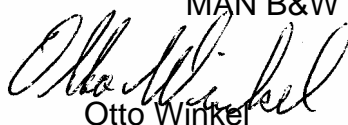

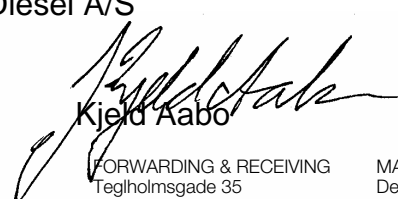

The intention with the handbook is that it will be of assistance in your daily work on fulfilling the requirements.

We should be pleased to receive feed-back on the content of this book enabling us to improve the second edition. Such feed-back should be directed to our department 2100.

Copies of the guideline can be ordered by contacting our department 4210 Sales Coordination and Sale of Data. The price of one copy is EUR 80.00.

Yours faithfully
MAN B&W Diesel A/S

Otto Winkler

Kjeld Aabo
