

Dear Sir or Madam

Engines designed by MAN Energy Solutions have been equipped with Mitsubishi turbochargers for more than four decades. By being an authorized repair agent, MAN PrimeServ has offered service, maintenance, and repair work for the MET turbocharger series for more than 15 years. Thanks to the recent expansion of our network, which now consists of seven strategically located service centres, we are now represented in all regions near major ports or dry docking locations.

With the introduction of PrimeServ Omnicare, our organisation has taken a step forward, towards global alignment of our Mitsubishi turbocharger services. Our service gives you the comfort of having a trusted single point of contact while one of our dedicated service centres takes care of your equipment.

As an original equipment manufacturer, MAN PrimeServ knows how important it is to maintain the highest quality standards in order to deliver the best overall lifetime performance. With this core value in mind, PrimeServ Omnicare maintains the same standard for the Mitsubishi turbocharger series. All spare parts installed on your turbocharger are from the original equipment manufacturer.

#### Contact

For more information, we kindly ask you to provide us with the turbocharger details and the running hours since the last overhaul. For that purpose we attached our contact form.

Should you have any queries, our Technical Service will be pleased to be of assistance:
