IHI 製ブロウウォッシュについて

VTR, RH..3, AT Turbochargers  
IHI Blower Wash

運転中のコンプレッサ洗浄に、IHI 製ブロウウォッシュは効果的ですが、ブロウウォッシュの輸出が制限されている地域があるため、供給が困難な場合があります。

IHI Blower Wash is effective to remove the dirt deposits on compressor wheel during operation. In some cases, it is difficult to get IHI Blower Wash because there are some unavailable countries for import limitation.

その場合は、“清水”によりコンプレッサ洗浄を行ってください。“清水”では溶剤の効果は期待できませんが、衝撃力によって汚れを落とすことが可能です。

In that case, the cleaning of the compressor is carried out with “clean water”. It does not act as a solvent, but the dirt deposit is removed by the mechanical impact of drops.
